

SAHIL SUHAS KULKARNI

DevOps Engineer

Pune, Maharashtra, India | +91-8237358949 | sahilkulkarni585@gmail.com | linkedin.com/in/sahil-kulkarni-9b40b3254 | github.com/sahilk-2002

PROFESSIONAL SUMMARY

Enthusiastic DevOps Engineer fresher with strong hands-on experience in AWS Cloud, Docker, Kubernetes, Jenkins, and Terraform through end-to-end project implementations. Skilled in designing CI/CD pipelines, containerizing microservices, and provisioning cloud infrastructure using Infrastructure as Code. Holds multiple industry certifications in AWS, DevOps, Linux, and CCNA. Known for a structured problem-solving approach, quick adaptability to new tools and technologies, and a collaborative mindset — committed to continuous learning and growing alongside the team.

PROJECTS

E-Commerce DevOps Implementation

Tools: GitHub Actions, Argo CD, Terraform, EKS, VPC, Route 53, Docker, Kubernetes, Microservices

- Designed and implemented end-to-end DevOps practices for a multi-microservice e-commerce application — analyzed the architecture independently, broke it into logical phases, and executed containerization, orchestration, IaC, and CI/CD in a structured sequence.
- Built a fully automated CI/CD pipeline using GitHub Actions and Argo CD, achieving single-touch end-to-end deployment for a Java-based microservice — researched Argo CD GitOps patterns independently and applied them within the project scope.
- Provisioned an EKS cluster within a custom VPC using reusable Terraform modules — focused on writing modular, team-friendly code so infrastructure could be easily understood and reused by others.
- Configured AWS Route 53 DNS nameservers mapped to a custom domain, exposing the frontend securely to external users via Load Balancer — debugged DNS propagation issues through systematic troubleshooting and documentation.
- Applied AWS networking best practices including VPC design, Security Groups, and Load Balancing — continuously referenced AWS documentation and community resources to self-learn and validate implementation decisions.

Infrastructure Provisioning Using Terraform

Tools: Terraform, AWS (VPC, EC2, IAM, S3), CloudFormation

- Developed reusable Terraform modules for VPC, EC2, IAM, and S3 — designed with a team-first mindset, ensuring modules were readable, well-commented, and easy for others to adopt without additional guidance.
- Reduced environment setup time by 60% by replacing manual provisioning with fully version-controlled IaC workflows — identified the inefficiency, reasoned through the solution, and validated results across multiple environment setups.
- Proactively explored Terraform best practices through documentation, community forums, and hands-on experimentation — applied learnings iteratively to improve module structure and state management.

TECHNICAL SKILLS

CI/CD & DevOps: Jenkins (Freestyle & Pipeline), GitHub Actions, GitLab CI/CD, Argo CD, Webhook Integrations, Automated Testing

Containerization & Orchestration: Docker, Docker Compose, Podman (basics), Kubernetes (Minikube, k3s, EKS), Helm (beginner)

Cloud Platform: AWS — EC2, S3, IAM, VPC, ECR, Route 53, CloudWatch, Security Groups, Load Balancing

Infrastructure as Code: Terraform (AWS provider — VPC, EC2, IAM, S3, Security Groups), Ansible (Roles, Playbooks, Inventory), CloudFormation (beginner)

Monitoring & Logging: Prometheus, Grafana (custom dashboards), ELK Stack (Elasticsearch, Logstash, Kibana)

Version Control: Git, GitHub, GitLab, Bitbucket — branching, merging, tagging, rebase, Git Flow, PR-based code review

OS & Scripting: Linux (Ubuntu, CentOS) — system administration, Bash scripting, Python (basic), Systemd, Cron Jobs, User & Permissions

Networking & Web Servers: TCP/IP, DNS, VPC, Load Balancing, Firewall rules, NGINX, Apache (Reverse Proxy, Load Balancing)

Other: YAML, HTTP methods, Microservices architecture

CERTIFICATIONS

- **DevOps Engineer (AWS)** — Seven Mentor PVT LTD

Covers end-to-end DevOps practices on AWS including CI/CD, containerization, and cloud infrastructure

- **Amazon Web Services (AWS)** — Seven Mentor PVT LTD

Core AWS services — EC2, S3, VPC, IAM, CloudWatch, Load Balancing, and cloud security

- **Linux System Administration (RHEL)** — Seven Mentor PVT LTD

Linux internals, system management, shell scripting, and server administration

- **Cisco Certified Network Administrator (CCNA)** — Seven Mentor PVT LTD

Networking fundamentals — TCP/IP, DNS, routing, switching, and network troubleshooting

EDUCATION

Bachelor of Computer Application (BCA) | Shivaji University, Kolhapur | 2020 – 2023

Junior College (Science) | Chate Jr College of Science, Kolhapur | 2018 – 2020

ADDITIONAL INFORMATION

Location: Pune, Maharashtra, India | **Preferred Work Locations:** Pune | Bangalore | Hyderabad | **Availability:** Immediate Joiner |

Work Mode: Onsite / Hybrid / Remote
